

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN DIEGO REGION

ADDENDUM NO. 2

TO

CLEANUP AND ABATEMENT ORDER NO. 98-11
SCHUTTE & KOERTING INC.
AND AMETEK, INC.

790 Greenfield Drive, El Cajon
San Diego County

The California Regional Water Quality Control Board, San Diego Region (hereinafter RWQCB) finds that:

1. Ametek, Inc. and Ketema, Inc. are required by Cleanup and Abatement Order (CAO) No. 98-11 to cleanup waste and abate pollution of ground water associated with discharges of chlorinated solvents at 790 Greenfield Drive, El Cajon in San Diego County (the Site).
2. Effective October 1, 1998 Ketema Inc. changed its name to Schutte & Koerting, Inc.
3. The following chlorinated solvents exist in ground water beneath the Site at concentrations above water quality objectives.

<u>Pollutant</u>	<u>Concentration</u>	<u>Maximum Contaminant Limit (MCL)</u>
Trichloroethylene (TCE)	21,000 ppb	5.0 ppb
1,1 Dichloroethylene (DCE)	23,000 ppb	6.0 ppb
1,1,1 Trichloroethane (TCA)	56,000 ppb	200 ppb

4. The continued presence of chlorinated solvents at concentrations as described in Finding 3 above are a source of ground water pollution. Allowing high concentrations of chlorinated solvents to remain in situ is likely to contribute to a prolonged discharge of waste in excess of water quality objectives, causing a prolonged condition of pollution.
5. The discharger has not taken interim actions, per Directive No. 5 of CAO 98-11, to abate the condition of ground water pollution on Site nor abated the threat of future conditions of ground water pollution.

Cleanup and Abatement Order No. 98-11

6. This amendment to an enforcement action is exempt from the provisions of the California Environmental Quality Act (Public Resources Code, §21000 et seq.) in accordance with §15321, Chapter 3, Title 14, California Code of Regulations.

IT IS HEREBY ORDERED that the following amendments be made to CAO 98-11:

1. The title of Cleanup and Abatement Order No. 98-11 shall be Schutte and Koerting, Inc., and Ametek Inc. Schutte and Koerting, Inc and Ametek, Inc. shall be responsible for compliance with CAO No. 98-11 and any amendment thereto. Any reference to "discharger" shall be interpreted to be a reference to Schutte & Koerting, Inc. and Ametek, Inc.
2. The discharger shall remove chlorinated solvents (e.g. TCE, 1,1,1 TCA, 1,1 DCE) from ground water to the maximum extent practicable. The discharger shall submit a work plan to the SDRWQCB by May 19, 2000 describing the method(s) by which chlorinated solvent waste will be removed from ground water beneath the Site.

JOHN H. ROBERTUS
